Performance Disclosures

Performance Disclosure:

The Overall Morningstar rating is based on risk-adjusted returns derived from a weighted average of the three-, five- and 10-year (if applicable) Morningstar metrics. The Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate; thus an investor's shares, when sold or redeemed, may be worth more or less than their original cost. More information can be found at winansinvestments.com

Morningstar Rating™

The Morningstar rating is a measure of an investment's load- and risk-adjusted return, relative to other investments in its peer group. Investments are rated for up to three time periods—three, five, and 10 years—and these ratings are combined to produce an overall rating. Ratings are from 1 to 5 stars, with the best performers receiving 5 stars and the worst performers receiving 1 star. The rating is a useful tool for investors to quickly and easily identify investments worthy of further research.
